

368. A pipe connected from the building gutter to the downspout

(a) Header

(c) Latrine

(b) Conductor

(d) Privy

369. Why do most wall-hung urinals Not require a trap?

- (a) They are designed to have an integral trap
- (b) Because such fixtures seldom receive solid waste
- (c) Traps are already provided down the soil pipe
- (d) Siphonic action that occurs in wall-hung urinals during flushing prevents the usage of traps
